

iNOS Recombinant antibody

Species reactivity: Human Mouse Rat

Cat: B09010R Company: HaoKebio

Uniprot ID:P35228 Applications: IHC:1:50-1:250

Organism: Rabbit IHC-Polymer: 1:200-1:1000

IHC-TSA:1:250-1:1200

WB:1:500-1:2000

Background:

NOS2, also named as iNOS and NOS2A, produc es nitric oxide (NO) which is a messenger molec ule with diverse functions throughout the body. NO is a reactive free radical which acts as a biol ogic mediator in several processes, including neu rotransmission, antimicrobial and antitumoral act ivities. NOS2 is a nitric oxide synthase which is expressed in liver and is inducible by a combinat ion of lipopolysaccharide and certain cytokines. i NOS has a very short half-life due to rapid degra dation by calpain. iNOS monomer is a direct sub strate of calpain I and can be cleaved by calpain I at the canonical CaM-binding site(503-532aa) of iNOS, and then a ~70 kDa band can be detected by western. This antibody is specific to NOS2.

Protein full name:

nitric oxide synthase 2, inducible

Synonyms:

NOS2, EC:1.14.13.39, Hepatocyte NOS, HEP-N OS, Inducible NO synthase

Immunogen:

Recombinant protein

Isotype:

IgG

Subcellular location:

Cytoplasm

Purity:

Affinity purification

Form:

Liquid

Storage Buffer:

PBS with 0.02%sodium azide,100 $\mu g/ml$ BSA and 50% glyce rol.

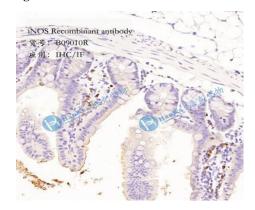

Storage:

Store at -20 °C for one year.

Experimental procedure:

Antigen retrieval: Citrate buffer (pH 6.0), Medium high heat for 8 minutes, stop for 7 minutes, medium high heat for 8 minutes. Incubate antibody, 4° C overnight. Secondary antibody: P oly-HRP Goat Anti-Rabbit & Mouse Universal Secondary Antibody, RT, 1h.

Images:

Sample: Mouse intestines, 4% PFA 12-24h

Source of Reagents:
